To Whom It may concern;

I just received a letter from SCE stating they were trying to raise electric rates AGAIN I have lived here at this address for 4 years. The rate 4 years ago was .07¢ per kilowatt hour now it is almost 11¢ per kilowatt hour, nearly 50 percent in 4 years. Unfortunately our income hasn't increased 50 percent, in fact I am unemployed and forced to LIVE WITHIN MY MEANS. (It's probably a strange concept for some people). We tried to get some help with the heat bills this past winter and was told there was no money so why send out notices saying there was help. My husband is a senior citizen on a FIXED INCOME. He has not received a cost of living increase. Neither has any other senior citizen. How about a senior citizen discount? I am at a cross roads and do I use electric to read or do I spend my money on food? The food wins; I will be using my candles to read by and when next winter comes will not be using electric to heat my house. When my frozen body is found, my children will probably file a lawsuit, you people make me sick. We all know there is a real warming it's just

another way to try and scam people
